

IF YOUR SCHOOL'S ACCOUNTING SOFTWARE IS A DAILY LESSON IN FRUSTRATION, YOU NEED MONEYWORKS.

When it comes to managing their financials, schools can be a mire of complicated reporting, multiple entities and numerous stakeholders. However, Colleen Rusbatch, Chief Financial Officer at St Kevin's High School in Oamaru knows MoneyWorks has the ability to manage it all.

"I believe schools are quite different from other organisations. For instance, at St Kevins the school and hostel are basically 2 different companies. As such we're required to run a range of different reports - one set for the finance committee and the other for the board. We're also required to provide reporting to the Ministry of Education. I need a financial software system that's powerful and flexible enough to develop and output these reports to whatever reporting regime is required. This is where MoneyWorks makes my life really easy".

"Within MoneyWorks we were able to easily set up all our reporting requirements without the need for extra plug ins. It's easily adaptable should more or less detail be required and I can run the school and hostel ledgers at the same time - 2 debtors ledgers and 2 creditors ledgers".

"It doesn't matter what we're doing, I can always find a way to make it happen. You can do anything with MoneyWorks".

MoneyWorks has been under continuous development since its release in New Zealand 20 years ago, and is now being used in over 100 countries worldwide. Dashboard charts show you at a glance how a business is performing, while on screen lists give you quick access to your system. It's also compatible across both MAC and PC platforms, but the jewel in the crown is the fact it has the most powerful reporting of any accounting system in its class. It helps you manage your business, not just account for transactions.

Graham Mills, Chief Executive Officer from Waitaki Boys High agrees:

"I've seen other systems being used and I believe MoneyWorks is as easy, or easier than anything I've seen. I picked it up without any training, its very intuitive".

"If I'm dealing with the auditors I can easily drill down into the account enquiry to find out what's happening on every transaction on a particular account or range of accounts. I can send them off as a PDF or spreadsheet, however they're required. The reporting within MoneyWorks is hugely powerful so I find it extremely useful".

Local Oamaru Chartered Accountant Adair Craik is a MoneyWorks advocate, and the person responsible for introducing both Graham and Colleen to MoneyWorks.

"There really is no other program that can deal with the complicated aspects of schools, especially when it comes to accurate and speedy reporting at multiple levels. Given that both Graham and Colleen swear by it I'd say the proof is in the pudding".

MoneyWorks is the most flexible, powerful and insightful accounting software for serious businesses. For a free 45 day trial visit moneyworks.net.nz
